

Products

Pre-stressed Pipe Wrap Wire

- For the manufacturing of pre-stressed concrete pipe, the wire is helically wrapped on the pipe, maintaining tension by mechanical means, eliminating the potential for tension cracks.
- No welds or joints
- 6,000-lb package reduces handling and splicing requirements
- Camesa pre-stress pipe wrap wire passes the strict hydrogen embrittlement requirement

STANDARDS:

- ASTM A-648, Class 2 & Class 3 tensile strengths
- Hydrogen Embrittlement Certified

DIAMETERS:

- Wire sizes: .192"-.250"

PACKAGING:

- 3,000-lb spoolless cores, tubular carriers, or steel reels
 - 6,000-lb spoolless core packages
-
